History of DENTECH

In 1907, Dentech Corporation, a pioneering manufacturer in Dental Instruments, was founded in Yanaka, Tokyo by Kenjiro Kimura, and it was originally named as Kimura Kousakusho.

We manufactured the first Japan made dental burs.

After Second World War

In 1944, the first factory was destroyed due to Second World War. In 1947, after the war, we transferred our factory to Itabashi in Tokyo and reconstructed it. However, in 1954, the strongest ever typhoon unfortunately struck around the area and the factory collapsed again. In 1955, we rebuilt a new factory at the place nearby the destroyed factory to continue providing our products for the customers.

First Advancement Overseas

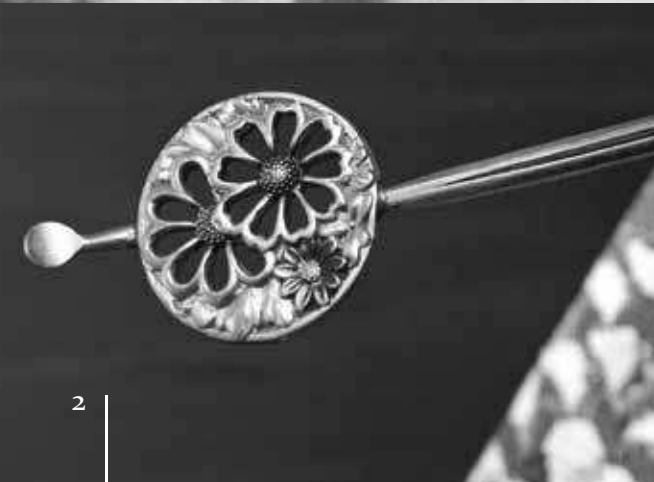

After Second World War, a lot of dentists came to Japan from the U.S. accompanying the occupation army and needed trustworthy dental instruments with high quality. Thus we were able to develop our products through the cooperation of them. In 1971, we launched to export our products overseas and our first overseas customer was in the United States.

Renamed as DENTECH

Kimura Kosakusho was renamed as Dentech Corporation in 1974. Since 1976 we have manufactured drills for implantology as the first implant drill manufacturer in Japan. Nowadays most Japanese implant makers adopt our drills.

The Current DENTECH

Today Dentech is well known as one of the companies which have the longest over 100 - year history in dental industry. KSK rubber dam instruments, implantation drills and burs as well as many unique products with Japan-made high quality are well supported by dentists and professionals all over the world.

Joint Performance with Japanese CRAFTSMANSHIP and Latest Machine Technologies

We possess CNC lathe, CNC Grinding machine, Heat treating machine, 3D CAD/CAM systems, and other various latest machines and equipments at our own factory in Japan. At the same time we are proud of the greatest technique by our craftsmen whose skill is unequalled with any others. We have an advantage in manufacturing extremely delicate dental/medical instruments using these two wheels which are identified by the machine automation and craftsmen's technique.

We have been developing, designing and manufacturing any kinds of dental and surgical instruments needed in clinical site around the world with outstanding quality for over a century.

It is a great honor for us that our products are highly respected all over the world. Our products would surely satisfy you.

Dentech has been assessed and certified as meeting the requirements of ISO 13485.

KSK Rubberdam system's products has qualified for the European CE mark medical device directive.

KSK Rubber Dam Clamps

Features

- KSK Rubber Dam Clamps are made of specially selected and tempered stainless steel.
- Ideal spring action and high resistance against the corrosion.
- Various forms are available, so you can choose clamps in accordance with the teeth.
- 4000 times open-close metal fatigue test goes for every production lot to assure long-term spring action.
- For stable forms, our craftsmen adjust bending every KSK clamps one by one manually.
- All beaks are sharpened for best fitting on the teeth.
- "BLACK" and "MATT" can avoid eye fatigue of dentists from reflecting operation light.

Finishing

NORMAL

Glossy finishing.

MATT

Sand blasted non glossy finishing.

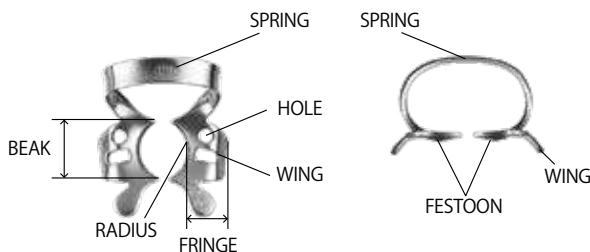

BLACK

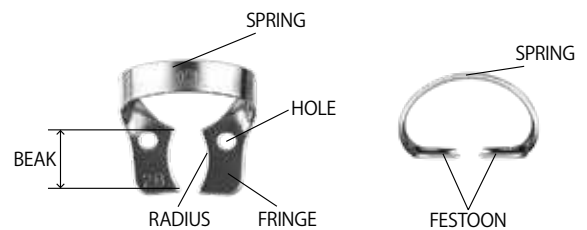

Not painted, Oxide layer finishing which is safe for human body

Winged or Wingless

WINGED

WINGLESS

[Important Safety Instructions]

It is likely to transform and to break when force is excessively added.
Please do not expand rubber dam clamps more than the necessity.

Dental Dams (Pure natural rubber)

Features

- KSK dental dams have a good resistance and elastic property.
- Packed in airtight aluminium bags to keep the rubber sheet fresh.
- "Thin" is made of color free material then capable for monitoring the condition of an patient during isolation treatment.

[Specification]

Packaging : 36 sheets / pack Size : 6"x 6" (152mm x 152mm)

Thickness : 0.20mm(Medium), 0.18mm(Thin) Color : Green(Medium), Ivory(Thin)

Scent : Non

Finger Ruler

Description

Can be attached on finger by free size. The adjustable stopper keeps its position by spring.

[Specification]

Material : Stainless steel Measurement length : 32mm

Product Code 03050000

Product **Finger Ruler**

X-Ray Mesh Gauge

Description

Suitable for root canal treatment. Accurate examination before placing an implant. checking of calculus quantity and its area.

[Specification]

Cover Material : Polyester Mesh Line Material : Stainless steel

● Dental Size

Size : 40 x 30mm Fine Grid : pitch 1mm Wide Grid : pitch 5mm

● Panorama Size

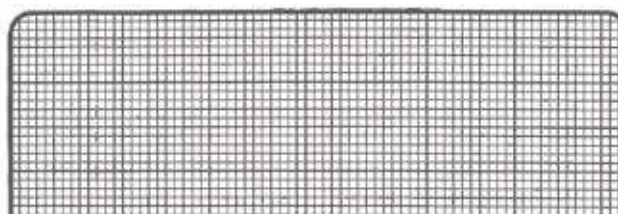

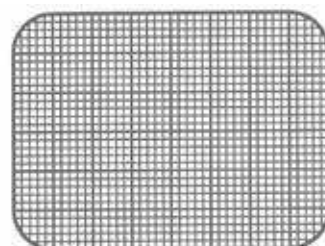

Size : 300 x 150mm Fine Grid : pitch 2mm Wide Grid : pitch 10mm

#R2(Yellow)

#R3(Red)

Precision Root Canal Model PRO

MTO

Features

- Reproduced precisely base on human root canal.
- For practical training ;
Line Up : 24 types, 3 Levels (Basic • Normal • High) by difficulty level
- Having visible root shape.

[Specification]

Main Body : Transparent resin

Root Part : Wax (white) filling

MOQ : 150 pcs./box (any type of combination is available)

Product Code As mentioned below

Product As mentioned below

Inventor : Dr.Takatomo Yoshioka

- Graduated from Graduate school of Tokyo Medical and Dental Univ. in 1996.
- By his lots of experiences of Conservative therapy and Endodontic Therapy awarded
Excellent Treatise award, Gramd, Grand chairman's award, Academic award.
- After opening Endodontic treatment clinic at Tokyo in 2010, also focusing on training new dentists with his case study meeting.

Tooth Separators

Elliot's Separator

Description

The pushing screw can be attached both right and left side.
Improved jaw design enable to be stable while pushing by the screw.

[Specification]

Material : Stainless Steel

Size : 37 x 67mm

Product Code 01071000

Product Elliot's Separator

Tooth Separators

Ivory's Separator

Description

With improved curved jaw design, thus separators become stable while pushing by the screw. It is applied in the front area of the upper and lower teeth.

[Specification]

Material : Stainless Steel

Size : 37 x 67mm

Product Code 01072000

Product Ivory's Separator

Articulating Paper Holders

Articulating Paper Holder, M-Type

Description

It is made with milled in order not to move articulating paper and designed to be convenient for the operator.

[Specification]

Material : Stainless Steel

Size : 145mm

Product Code 06121000

Product Articulating Paper Holder, M-Type

Articulating Paper Holder, Y-Type

Description

Sure holding of Articulating papers by pins and holes. Ideal to make for full dentures.

[Specification]

Material : Stainless Steel

Size : Large 74 x 60mm Small 66 x 48mm

Product Code 06122000

Twist Drills Black

Description

A surgical drill with increased abrasion resistance, corrosion resistance, durability and hardness with DLC coating. It comes with a movable stopper which allows for the length of the drill to be adjusted and a dedicated wrench. The adjustment range for the stopper is between 6 - 11mm for short, and 11 - 16mm for long.

What's DLC?

DLC is short for "Diamond Like Carbon", and it is technology that coats a nano - level hard film with properties that resemble that of diamonds onto metallic surfaces. While having approximately 5 times the hardness compared to existing products, it has shown overwhelming low friction factor and it is recognized as the most technologically advanced among the many surface treatment techniques available.

Twist Drills

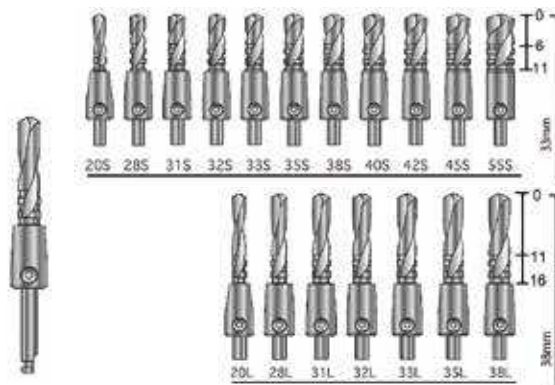

Twist Drills External Cooling

Description

Our drills are made of stainless steel with high carbon. It assures enough hardness, good cutting efficiency and long life. But rather weak for rust. Careful maintenance will be required to avoid rust and to assure along life.

Good maintenance

- ① Immediately after use, drills should be dipped into anti-rust solution.
- ② Stopper should be removed while cleaning and autoclave.
- ③ Blood and bones should be removed completely after use.
- ④ Use only refined water for autoclave.
- ⑤ Use drill stand while autoclave, do not put into sterilization bag directly.

Twist Drills Internal Cooling

Description

The drills with internal cooling system should be used also with external cooling. Drill speed should be controlled from 600rpm(thick drills) up to 1000rpm(for fine drills).

Cutting efficiency is coming bad by each use and bad drill will cause heat damages against bone. Only good drills should be used for operation. For very hard bones, it is recommended to use surgical burs prior to implant drills. Surgical burs will help easy drilling and long life. The fix screw of drill stopper is so small and it can not be bear a strong force. Drills can be used also without stopper.

Trephine Burs

Description

Trephine Burs do not have blade at center, thus it will be rather difficult to get smooth cutting for a start. Enough exercise is recommended before use. After Trephine Burs penetrate into bone, then smooth cutting is available. To avoid choking on bone inside Trephine Bur, pull of Trephine Burs up and down, so that bone will always remain at patient. Remained bone can be collected by surgical curettes. Enough cooling and possibly low speed is recommended to avoid heat damage against bone.

Surgical Burs

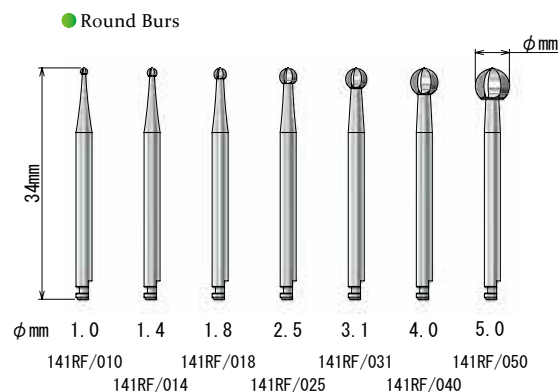

Surgical Bur External Cooling System

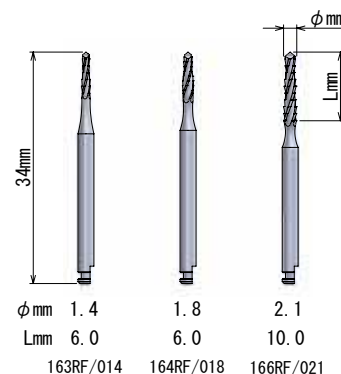

Description

- **Round Burs**
Round burs for bone cutting, ruff cutting edges to prevent clogging. Full group blades ensures excellent cutting efficiency.
- **Dr. Lindemann Bur**
Dr. Lindemann Bur has fully around blades.

Implant Drill Checker

Description

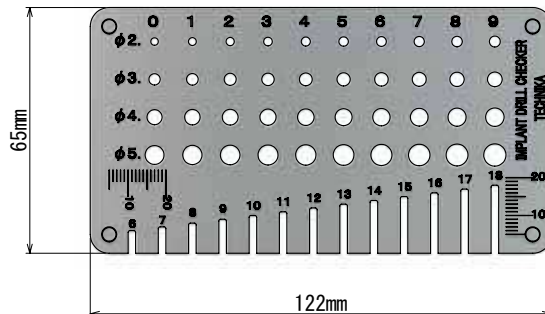

Can be measured diameter of 2.0 - 5.9mm.
Can be measured length of 6.0 - 18.0mm.
With length scale of 5 - 20mm. Can be used for drill stand.

[Specification]

Material : Stainless steel

Product Code 30080012

Product Implant Drill Checker

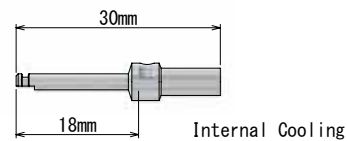

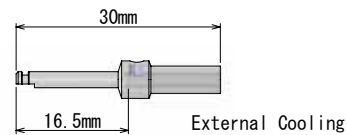

Drill Extenders

Description

Two types : External cooling/Internal cooling
Extension length : External cooling is 16.5mm,
Internal cooling is 18 mm.

[Specification]

Material : Stainless steel

Product Code 30080001

Product Drill Extension External Cooling

Product Code 30080002

Product Drill Extension Internal Cooling

Drill Extension SHORT External Cooling

Description

Can extend the drill length slightly 5mm.
Easy attaching without tools.

[Specification]

Material : Stainless steel Diameter : 7.7 mm

Product Code 30079991

Product Drill Extension SHORT External Cooling

Para Drill Aid II

Description

- Attachment drill aid for parallel implantation.
- Four guid - pins and three drill - sleeves make surgery better and shorter.
- You can easily make a hole for parallel implantation.
- Pilot drill (dia 1.8 to 2.0mm) is available.
- All parts are autoclavable.

[Specification]

Material : Stainless steel

Product Code 30080200

Product Para Drill Aid II

Technika Bone Mill Set

Description

- Simple and compact
- Easy operating
The angle mount enables easy and smooth operating.
- Easy milling
The unique shaped cutter with DLC coating enable easy and fine milling.
- Easy assembling
The simple structure saves time for operating and cleaning With sterilization case and cleaning brush Cutter for substitute. ※sell separately

Product Technika Bone Mill
with sterilization case

Technika “REPAIR TAP”

Description

- For internal threads repair.
- Made of high corrosion resistant stainless steel compatible with autoclave.
- Long lasting DLC coating.
- Safe Handle

[Specification]

Material : Stainless steel (Tap and Handle)

Surface Treatment : DLC coating (Tap)

Thread Diameter x Pitch : M1.6 x 0.35 / M2.0 x 0.4

Made in Japan

Product Code	30011110	Product	REPAIR TAP M1.6 with Handle
Product Code	30011130	Product	REPAIR TAP M2.0 with Handle
Product Code	30011210	Product	M1.6 Tap only
Product Code	30011230	Product	M2.0 Tap only
Product Code	30011300	Product	Handle for Repair Tap

● REPAIR TAP with Handle(Basic Set)

M2.0

● REPAIR TAP

For users having "Handle"

● Handle for Repair Tap

Compatible to both Tap

Depth Gauges

Description

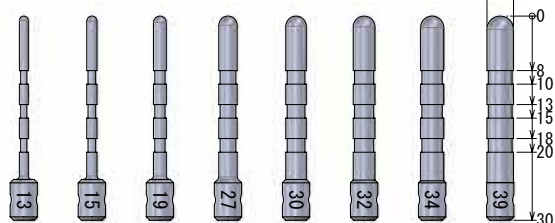

Graduations on 8, 10, 13, 15, 18, 20.

Graduations can be exposed on X-ray film.

Diameter : 1.3, 1.5, 1.9, 2.7, 3.0, 3.2, 3.4, 3.9mm.

[Specification]

Material : Stainless steel

Product Code	30072130	Product	Depth Gauge 1.3
Product Code	30072150	Product	Depth Gauge 1.5
Product Code	30072190	Product	Depth Gauge 1.9

Gingiva Gauge

Description

The first division shows 1mm when top of measuring block and needle are coincide. Wide of graduation is 1mm and pitch is 2mm, thus each graduation shows the gingival thickness of 2, 3, 4, 5, 6, 7mm. Put the measuring block in right angle to gingiva, then prick gingival by light force until needle reaches to bone. Pull out carefully so that measuring block would not moves. Read the thickness at the back side of measuring block.

Product Code 30080013

Product Gingiva Gauge

- Can be measured the thickness of gingiva from 2mm to 7mm in increments of 1mm during implant operation.
- For a more exact and detailed measure. It is better to use micrometer caliper separately.

Color Boxes

Description

● Sterilization Box

Can be housed three bur stands.

● Color Boxes

Box for small arrangement. The inside has been partitioned into six rows.

[Specification]

Material : Aluminum

Size : 170 x 70 x 30mm (Sterilization Box)

Size : 135 x 55 x 180mm (Color Boxes)

Color : Silver, Blue, Red, Gold, Green (Color Boxes)

Product Code 30080024 Product Sterilization Box

Lip & Cheek Retractor

Features

To retractor cheeks and to have a better view. Can be packed by quantities of customer's order.

[Specification]

Material : Polycarbonate Set of 2pcs

Product Code	50570131	Product	Lip & Cheek Retractor Set
--------------	----------	---------	---------------------------

Dry heat is prohibited

Dry Field Mouth Props

Features

Great for air - abrasion prep and sealants .

- Comfortably holds the jaw open.
- Retracts and protects the patients cheek and tongue.
- Create a moisture - free environment.

[Specification]

Material : Polycarbonate

Product Code	50570000	Product	Dryfield Mouth Props #1 labial (Set of 3 pcs)
Product Code	50570002	Product	Dryfield Mouth Props #2 large (Set of 3 pcs)
Product Code	50570001	Product	Dryfield Mouth Props #3 small (Set of 3 pcs)
Product Code	50570005	Product	Dryfield Mouth Props Assort (#1,2,3)

#1 Labial

#2 Large(Posterior)

#3 Small(Posterior)

Bite Expander

Description

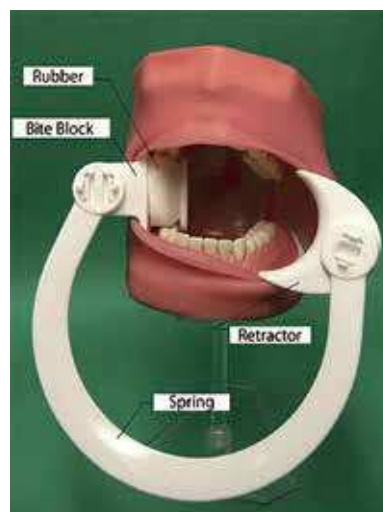

“Bite Expander” has function of Retractor and Bite block. You can easily change 4 patterns for every treated area.

- This device serves the purpose of both a cheek retractor and bite block.
- Can be used on every part of the mouth.
- Made from silicone and polypropylene.

[Specification]

Material : Silicon rubber and Polypropylene

Product Code	07000150
Product	Bite Expander
Product Code	07000155
Product	Extra Rubber Pads for Bite Expander (2pcs)

Dry heat is prohibited

Big Oral Mirrors Real-Fine

Features

- Ideal for distortion - free intra - oral photos.
- Extensive rhodium coating on one side.
- Sturdy, durable.
- With detachable silicone handle.
- Autoclavable in the provided fabric bag.

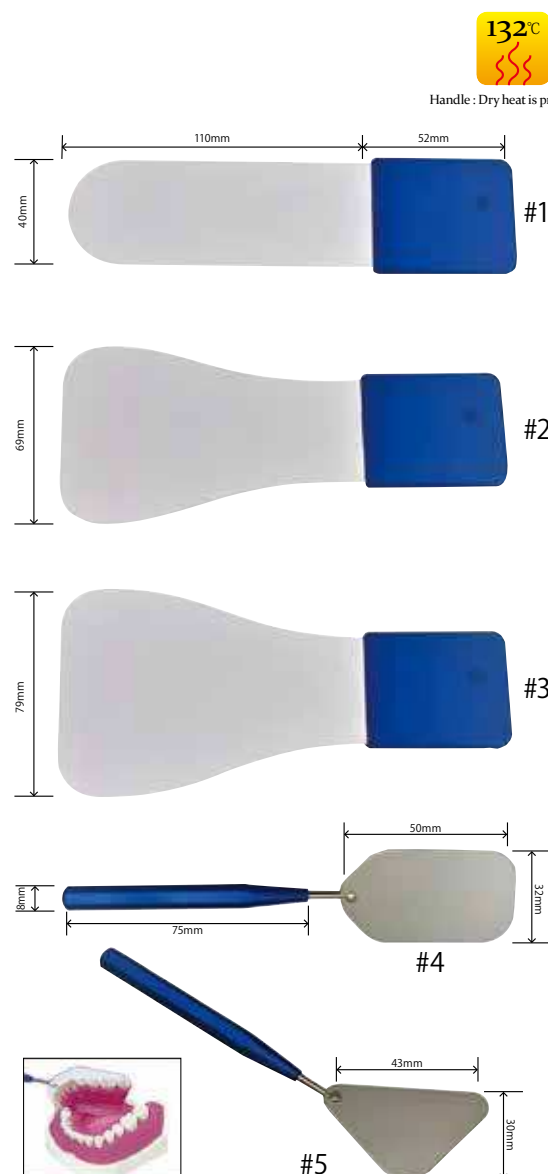

#1 : Side views. #2 : Occulusal views (medium). #3 : Occulusal views (large).

#4 : For lingual side views of posteriors.

#5 : For lingual side views of anteriors. Handle for #4 , #5 : aluminum.
